

To date, communities and institutions have used 45+ Growcer farms to grow **more than four million servings** of local, nutritious greens across Canada.

GROWERS MAKING AN IMPACT

The **Churchill Northern Studies Centre** grows fresh produce in northern Manitoba where temperatures dip below -50°C - and has grown 60,000 pieces of produce since 2017!

Norway House Cree Nation grows greens for the local school where up to 700 students can eat fresh greens daily. Profits from the project are retained as band revenue.

Gitmaxmak'ay Nisga'a Society runs a fresh greens subscription box in one of the rainiest cities and donates the surplus to community members in need.

Yellowknife Co-op in the Northwest Territories keeps their produce department stocked with fresh, high-quality produce year-round.

Altario School creates a one-of-a-kind agriculture education where students can learn about indoor agriculture in the Growcer farm, alongside raising cattle, sheep, and working with bees.

New Horizon Co-op sells locally grown produce under its store brand so customers can choose to keep their dollars local in Grande Prairie, Alberta.

Squamish Nation uses their Growcer farm to grow fresh produce for their community kitchen and pantry that supports Ayás Ménmen Child and Family Services.

Audrey Turgeon expanded her 40-cow dairy operation with a Growcer farm to supply fresh greens in rural Quebec.

Sheshegwaning First Nation grows fresh greens for the community and is expanding with a second Growcer farm to sell locally grown produce to businesses across Manitoulin Island.

The Pirursiivik Project in Inukjuak uses art and gardening to run educational programs about growing food, while providing a fresh supply of produce year-round.

Acadia University grows safe, fresh greens within 50 feet of its dining hall and donates 10% of the harvest to on-campus food banks.

École KLO Middle School integrates their Growcer farm in their science curriculum to enhance the classroom experience.

Because of Growcer, countless people now have access to fresh food locally, and your community can be next. 🌱
