

Hub Unit

Empowered to grow more through modularity. Adding a Hub Unit to your project lets you plan for future growth, scale operations, add workspace for cleaning and storage, and give your farm added flexibility.

Make it a storefront, or use it to pick and pack greens for retail delivery, it's up to you. Hub Units also provide an added level of biosecurity and frost protection by acting as a larger insulated entry way to your main growing area.

Turn your farm into your storefront with modifications like a horizontal sliding window (53" x 36") with struts and an awning. Adding a window allows you to add that human touch to take and fulfill customer orders, direct from your farm.

Product features

- Available in 21' (can attach 2 farms) and 42' (can attach 4 farms) configurations
- **Included:**
  - Stainless steel packing table
  - 2 or 3 (42' unit only) compartment sink, commercial-grade with water heater
  - Added storage shelves
  - Refrigerator for produce storage
- **Unique to the 42' unit:**
  - Triple sink for wash, rinse, and sanitize procedures
  - Separate hand-washing sink
  - Two 54" double-door refrigerators
  - Extra packing table and expanded storage shelves
